

SWITCH is a student-managed interdisciplinary wellness project based out of the Westside Community Clinic. The aim of the project is to provide after-hours walk-in health services to the residents of Saskatoon's core neighborhoods. SWITCH is a true multidisciplinary clinic that offers many health care services; including physical therapy. Students from the School of Rehabilitation Science may volunteer at SWITCH following an orientation to be held in September 2019.

For more information on upcoming programming visit the SWITCH website at <http://switchclinic.com> or follow their page on Facebook: <https://www.facebook.com/SWITCHClinic/>

Questions regarding student involvement at SWITCH may be directed to PTSS representative Jill George at jig726@mail.usask.ca
