

All You Need To Know About MPT Clinical Placements

1 Clinical Placement Integration

Your clinical placements will be integrated into your MPT program curriculum.

This helps you to practice the skills you have gained in class throughout your program in a clinical setting.

2 Where Will Clinical Placements Be?

Throughout your program you will be required to complete a minimum of 2 clinical placements anywhere in Saskatchewan, outside of Saskatoon.

At least one of these will be a **rural** placement.

3 Travel Expenses

Students are responsible for all costs related to their clinical placements including housing, food, mileage/transportation, and any other expenses.

There is an option to apply for a travel bursary at the end of the program to help offset these costs.

4 How Many Clinical Placements Are There?

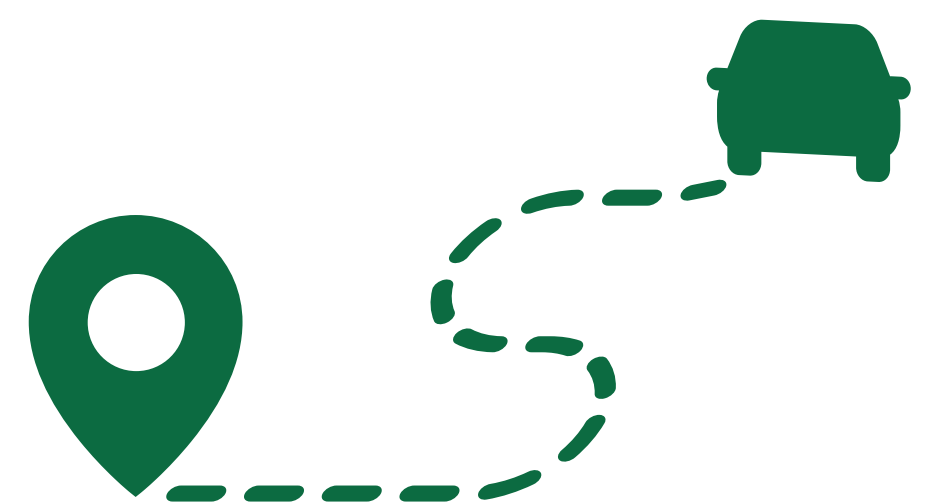

You will participate in 6 unique clinical placements in a variety of practice settings.

Placements range from 1-6 weeks in length. You must complete 1025 hours of clinical practice.

5 Preferences

You will be able to provide the clinical education team with your preferences for locations for your placements.

We do our best to match student preferences with community placement offers.

6 Can I Have Placements Out of Province?

Out of province placements are available on a limited basis and not always guaranteed. They have to be arranged by the school and not the student.
