

MPT Research Projects 2020 Application

Application Deadline: 24 January 2020 at 4:30 PM

Please complete the application, ensuring to answer all questions below and submit to srs.research@usask.ca by 24 January 2020 at 4:30 PM. Provide adequate information for each section while respecting the word limits.

NOTE: As this funding will be going to the student's salary exclusively, this application is intended to be primarily completed by the student with the supervisor contributing in an advisory capacity.

Student Information			
Name:		NSID:	
Email:		Year of Program	
Supervisor Information			
Name:		NSID:	
Email:		Department:	
Project Details			
Project Title:			
Full Project (300 hours)		Half Project (150 hours)	
Start Date:		End Date:	
Research Site(s):			
Requesting Cancer Registry Data?	Yes	No	
<p>If YES, please contact datarequest@saskcancer.ca for information on how to apply to access the data. The agency will need you to complete their data access form regarding your project to analyse whether they have the data you require and can accommodate your work. The form can be accessed through the email above.</p> <p>**NB: Requests for use of SK Cancer Registry data must be submitted by 6 December 2020 to ensure review and approval.</p>			
<p>Any project application involving a clinical/research placement must include a letter from the Academic Clinical Education Coordinator verifying that consultation has occurred.</p>			
Does project involve a clinical/research placement	Yes	No	

MPT Student Research Project Application

Project Description

The project description is to be written by the student in conjunction with the supervisor. Avoid unnecessary jargon, explain all abbreviations used, and check spelling carefully.

NB: No additional figures or appendices above the one-page Project Description are allowed and, if included, will be removed.

a. Using a maximum of one page, outline the major elements of the project clearly and concisely. Be sure to include the following elements:

- **Background Information** (importance and significance)
- **Hypothesis and Expected Outcomes**
- **Detailed Timeline** (300 hours for a full project; 150 hours for a half project)
- **Methodology and Analysis** (be as specific as possible in the space allowed)
- **Deliverables** Applicant and supervisor

Page setup and formatting for attachments:

- **Header:** Include applicant's last name and title/label (e.g. Psmith, *Project Title*)
- **Footer:** Page X of X
- **Margins:** 1"
- **Page:** 8.5" x 11"
- **Font:** 11 point Arial
- **Line Spacing:** Single
- **Spacing:** no condensed type or spacing

b. **Optional: Attach a list of reference cited** (Not included in the one-page limit)

Student Statement

In your opinion, why is research experience important for future physical therapists? How will your abilities and experiences allow you to be successful in research both this year and in your career? (250 word maximum)

MPT Student Research Project Application

Supervisor Statement

Please describe the work the student will be assigned, the expectations for the student and who will primarily be supervising the student throughout the term of the project. Additionally, please provide a contingency plan for the student if the project is delayed for any reason. (250 words)

Please summarize the work the student will be assigned and the expected learning outcomes for the student. (250 words)

MPT Student Research Project Application

Agreement Acknowledged by Student and Supervisor

Please ensure signatures are obtained from **both the supervisor and the student** acknowledging the agreement and submit to srs.research@usask.ca

I agree, to the best of my ability, that the information above is correct and that the duties and responsibilities have been mutually agreed upon by both parties.

I understand that the research project must be completed within the time frame and that both a report and poster presentation will be submitted based on the outcomes. There will be no extensions granted.

Proposed timelines have been reviewed by both parties and are deemed appropriate and realistic for this project.

I understand that if the student is dissatisfied with the supervision and has been unable to resolve the issue with the supervisor they must contact the School of Rehabilitation Science Research Coordinator for assistance.

I understand that if the supervisor is dissatisfied with the student performance and has been unable to resolve the issue with the student they must contact the School of Rehabilitation Science Research Coordinator for assistance.

I understand that if the student does not communicate with the School of Rehabilitation Science Research Coordinator in a timely fashion in light of any concerns, they may be asked to reimburse the School of Rehabilitation Science for their scholarship and the Director of the MPT Program will be notified.

I understand by submitting a completed copy of this application I have agreed to the above terms, as well as any terms and conditions outlined in the guidelines.

Intellectual Property

Are there any pre-existing contracts that impact on the student's ability to be listed as an author on a resulting publication?	Yes	No
---	------------	-----------

Publications

If the data are sufficient to submit for publication, it is expected that the student will be one of the authors on the publication.

I agree with the above stipulation about publication acknowledgment	Yes
---	------------

Please complete below to verify agreement:

Student Name:	
Signature:	
Supervisor Name:

Date:	

SCPOR Patient-Oriented Research Questionnaire

Is your project a Patient-Oriented Research Project?

Yes (Answer 5 Questions Below)

No (Skip 5 Questions Below)

Using the [Patient-Oriented Research Level of Engagement Tool \(PORLET\)](#) as a guide, please provide project information on the following:

1. Patients are partners (max 100 words). Describe how patients will be actively involved in planning, decision making and co-leading the creation. Sharing of the knowledge within this research project.

2. Patients identified priority (max 100 words). Summarize how patients with lived experience have helped and/or will help identify that the proposed research topic is a priority to patients. Include details of the methods used to identify or validate the research priority among patients.

3. Outcomes important to patients (max 100 words). Describe how outcomes important to patients will be chosen and will be measured. Explain how the knowledge created through the proposed research will be used to improve outcomes important to patients.

MPT Student Research Project Application

4. Team is multi-disciplinary (max 100 words). Describe how the research will be influenced by relevant disciplines and stakeholders throughout the project.

5. Aims to integrate knowledge into practice (max 100 words). Outline the steps required to implement an integrated and end-of-grant translation strategy.
